Acknowledgments

Acknowledgments

The Social Assessment Group gratefully acknowledges the assistance provided by the Sakhalin Island community and to those whom participated in the development of this assessment. During the course of this assessment we prevailed upon the time and patience of many people. We give our special thanks to people who consented to be interviewed and expressed their support during consultations by attendance and active participation.

The Group would also like to thank the administration and heads of community administrations for their warm reception and genuine co-operation.

We are thankful to the heads and staff of enterprises, organisations and governmental structures for their help in providing information and participating in interviews. Their input in the development of the Social Impact Assessment Report was invaluable.

The report was made possible through co-operation with Sakhalin Energy Investment Company Ltd. and its Contractors' staff. Without their support and assistance this assessment would not have been possible.

Finally, Yuzhno-Sakhalinsk photographer Vladislav Titov contributed many of the photos used in the report.
